FOREWORD

Current identifiers and codes in the United States and Canadian Air Traffic Control Systems are listed in this handbook. It contains guidelines for requesting location identifiers, name-codes, and procedure codes. Included, also, is a brief explanation of assignment principles.

CHAPTER 1. GENERAL

SECTION 1. INTRODUCTION

1. PURPOSE.

This order lists the location identifiers authorized by the Federal Aviation Administration, Department of the Navy, and Transport Canada. It lists United States airspace fixes and procedure codes. The order also includes guidelines for requesting identifiers and procedures for making assignments.

2. DISTRIBUTION.

This order is distributed to offices in Washington and Regional Headquarters, Flight Inspection Field offices, Airways Facilities Sectors, Airways Facilities Sector Field offices, FAA Technical Center. Technical Assistance Groups, and the Aeronautical Center. Copies are sent to all Air Traffic Control Facilities and to selected external addresses.

3. CANCELLATION.

Order 7350.5V dated February 9, 1989 is canceled.

4. ISSUANCE.

a. This order is published as a complete reprint on alternate aeronautical chart dates: every one hundred and twelve days. The next edition is scheduled for September 21, 1989.

b. Each fifty-six days between editions, a change is issued which contains the current airspace fixes, SID/STAR procedure codes and changes in Center Control Area for airports because of center boundary realignments. The next page change is schedule for July 27, 1989.

c. Important interim United States identifier assignments, corrections, or deletions are published in the National Flight Data Digest for use between revisions of this Order. Users should carry forward to this publication any changes pertinent to their operation.

5. NOTATION OF CHANGES.

Except for airspace fixes, additions and corrections in this order are summarized in Appendix 2.

6. IDENTIFIER DELETIONS.

Deletions are listed in Appendix 1.

SECTION 2. LOCATION IDENTIFIERS SYSTEM ADMINISTRATION

7. USE OF LOCATION IDENTIFIERS.

a. A Location Identifier takes the place of the name and location of an airport, navigation aid, weather station and manned air traffic control facility in air traffic control, telecommunications, computer programming, weather reports and related services.

b. Identifiers in the U. S. DOD Overseas Section of this order are intended for personnel and cargo movement only and not for use in flight plans.

8. ASSIGNMENT AUTHORITIES.

a. The Federal Aviation Administration assigns three-letter identifiers (except those beginning with the letters, K, N, Q, W, Y, and Z), three and four character identifiers, and five-letter name codes for the United States and its jurisdictions.

b. The Department of Navy assigns three-letter identifiers beginning with the letter N, for the exclusive use of that Department.

c. Transport Canada assigns two, three, and four character identifiers, including three letter identifiers beginning with letters Y and Z, for its areas of jurisdiction.

d. The Federal Communication Commission assigns blocks of identifiers beginning with K and W for its areas of responsibility—the block beginning with Q is under international telecommunications jurisdiction.

e. The National Weather Service assigns four-letter, one-number identifiers for certain weather requirements.

9. COORDINATION.

a. In the FAA.

(1) The Airspace-Rules and Aeronautical Information Division is responsible for coordination of requests for Location Identifiers within each region.

(2) Any reapplication or change in usage of a location identifier assignment must receive prior clearance from ATO-250.

(3) Occasions will arise where a sponsor or interested group will seek the advice of regional or field personnel concerning assignment of a particular identifier or a change to a more preferred identifier. In these situations no commitment shall be made. Inquiries of this nature shall be referred to ATO-250 for information and advice concerning appropriate handing of such matters.

b. In the Department of Navy, Naval Telecommunications System, ICO-5, is responsible for final coordination and assignment of "N" identifiers.

c. Transport Canada, Aeronautical Information Service is responsible for final coordination and assignment of location identifiers.

10. PERMANENCE.

a. Established identifiers are considered permanent. Three-letter identifiers will not be changed without strong and documented justification, primarily concerning air safety.

b. Location identifiers are not interchangeable and cannot be transferred from one location to another or from one airport to another even within the same community.

c. The original identifier will remain in effect, in most instances, even though it has been necessary to change the facility's name.

11. DUPLICATION.

a. At the same location, the same identifier may be assigned to one navigation aid within the airport's boundaries, to the airport, to a manned air traffic control facility and to an aviation weather station on the airport. With certain restrictions, variations of the airport identifier may be assigned also to Landing Systems.

b. Some duplication of three-letter assignments has been made between air navigation facilities in the contiguous United States, which are not associated primarily with a landing area, and U.S. Department of Defense overseas airbases. For example, the second ILS at an airport in the U.S. and an airbase in Italy, or, an airbase in Germany and an en route VORTAC in the U.S.

c. The first and second letters or second and third letters or third and first letters of a three-letter identifier may not be duplicated with less than 200 nautical miles separation.

12. EFFECTIVE DATES.

Location Identifiers are published in the next edition of the order, following assignment. All segments of the aviation industry and many related activities use these codes in their daily business. The effective date of the assignment, therefore, is set by each user group according to their respective requirements.

13. ASSIGNMENT SYSTEM.

a. Three-letter Identifiers are assigned as radio call signs to aeronautical navigation aids; to airports with a manned air traffic control facility or navigation aid, within their boundaries; to airports that receive scheduled route air-carrier or military airlift service.

b. Navigation aid identifiers are assigned by the following standards:

(1) Instrument Landing System (ILS) Localizers and Associated DME's. The initial ILS localizer is usually assigned the same identifier as the airport it serves. (This

may be altered if the airport has not yet been assigned a three-letter identifier, or if the airport identifier begins with a "K,""N," or "W"). If additional localizers are established, separate three-letter identifiers will be assigned each facility. This shall apply whether an additional localizer is to serve the opposite end of an ILS equipped runway or a parallel runway, even though both systems operate on the same frequencies on a non-simultaneous basis. To distinguish the ILS localizer from another VHF facility using the same identifier, the keyed ILS identifier is proceeded by the letter "I". When DME is installed as an integral component of an ILS, the same identifier, preceded by the letter "I" will be assigned to both the localizer and DME.

(2) Interim Standard Microwave Landing System (ISMLS). The same criteria shall be used to assign an identifier to an ISMLS as an ILS. The identifier assigned, however, shall be preceded by the letter "M". If an ILS and ISMLS are installed on the same runway end, one basic identifier may be assigned preceded by an "I" for the ILS and an "M" for the ISMLS.

(3) Compass Locators. The general term "compass locator" also covers NDB/OM, LMM, and LOM regardless of output power or type. The term is applied only to a non-direction radio facility which is located at the VHF middle or outer marker site (front course) of an ILS. It is assigned a name-code and a two-letter identifier. The two-letter identifier is derived in the following manner:

(a) The three-letter localizer identifier is considered as a base.

(b) The first and second letters of the three-letter localizer identifier are assigned to the outer marker compass locator (LOM) and the second and third letters are assigned to the middle marker compass locator (LMM). Example:

Raleigh-Durham	ILS	Localizer	I-RDU
	LOM		RD
	LMM		DU

(4) Localizer Type Directional Aids (LDA). This equipment is of comparable accuracy to an ILS localizer and may be used in conjunction with a glide slope and/or markers. It usually does not meet ILS siting standards and is not part of an ILS. It is, however, assigned a three-letter identifier preceded by the letter "I"

(5) Simplified Directional Facilities (SDF). This equipment is a directional type aid which operates on localizer frequencies. It is assigned a three-letter identifier and shall not be preceded by the letter "I". It does not meet all localizer performance tolerances and does not have markers. (See Order 8200.28B, 25 Aug 78).

(6) Non-directional Radiobeacon. Non-directional radiobeacons are assigned three-letter identifiers except when they are also the outer compass locator (LOM) or middle compass locator (LMM) of an ILS, or placed at a marker site of an ILS. See Compass Locators above. The same basic three-letter identifier cannot be shared by a terminal NDB and an ILS at the same location.

(7) VOR, VORTAC, and TACAN Facilities. These facilities are assigned three-letter identifiers. If two or more such facilities or an NDB are established at a location, they will be assigned different identifiers. The same basic three-letter identifier can be assigned to one of these terminal facilities and to an ILS localizer at the same location.

(8) Distance Measuring Equipment (DME). This equipment is used in conjunction with several type navigation aids. It is assigned the same identifier as its associated aid, whether a VOR/DME, NDB/DME, or ILS/DME.

c. The One-number, Two-letter identifiers have been assigned mostly to airspace fixes, which are in the process of conversion to name-codes. Some of these identifiers are assigned to airports, weather stations and special-use locations. In this identifier series, the number is always in the first position of the three-character combination.

d. One-letter, Two-number Identifiers are assigned to airports within the United States and its jurisdictions which do not meet the requirements for identifiers in the three-letter series. These identifiers are assigned also to aviation weather reporting and observation stations.

(1) One-letter, two-number identifiers are keyed by the alphabetical letter. The letter may appear in the first middle or last position in the combination of three characters. The letter generally signifies an Air Traffic Control Center's Area. An assignment does not change, however, when a control area boundary changes.

(2) Identifiers in this series which could conflict with the "Victor," "Jet" or colored airways numbers are not assigned.

e. Two-letter, Two-number Identifiers are assigned to airports in the United States and its jurisdictions which do not meet the requirements for three-letter assignments.

(1) Two-letter, two-number identifiers are simply an expansion of the dwindling one-letter, two-number series.

(2) They are keyed by the two-letter Post Office or supplemental abbreviation of the state in which they are assigned. The two-letter may appear in the first two, middle two or last two positions of the four character code.

(3) The following supplemental codes are used in this identifier series:

CL	California
FD	Florida
II	Indiana
IS	Illinois
LL	Illinois
LS	Louisiana
MU	Missouri
MY	Minnesota
NA	North Dakota
NK	New York
OA	Ohio
OI	Ohio
PN	Pennsylvania
PS	Pennsylvania
TA	Texas
TS	Texas
XS	Texas
WN	Wisconsin
WS	Wisconsin

f. A single five-letter pronounceable combination serves as the fix name, assigned identifier and computer code. If a new fix is to be collocated with an existing navigation aid, ILS marker, waypoint, or other type fix, the original name or name-code applies to both. (See Order 7350.2 for details.)

g. Weather Offices and Stations, may be assigned in any of the series of Location Identifiers, depending upon type or combination of Station. Generally, a Weather Service Office at an Airport is given a three-letter identifier. AMOS equipment may be polled with any combination of three-character identifiers. Some type of Aviation Weather Reporting Stations are listed with two-number, one-letter identifiers.

14. CANCELED ASSIGNMENTS.

a. All users are requested to periodically review assignments in their area of responsibility, and notify ATO-250 as soon as an identifier or name-code may be canceled.

b. Canceled three-letter assignments are held in abeyance for one year, usually, before becoming available for reassignment.

c. Canceled numero-alpha and five-letter assignments are held in abeyance an appropriate length of time depending upon circumstances of cancellation, but not more than one year.

15. CORRECTIONS.

a. Upon receipt of this order, users are requested to verify the proper listing of identifiers in their area of responsibility. Omitted, incorrect and obsolete assignments and tie-in facilities should be reported immediately to the FAA. If available, include the correct information.

b. A tear-out page is included inside the front cover for this purpose.

16. TIE-IN FACILITY.

The "FAA TIE-IN FACILITY" indicates which telecommunications facility* handles flight plan message for the listed airport. This applies also to airports in Canada. Tie-in Facility hours are local times.

17. CENTER'S CONTROL AREA.

The computer code for the U.S. ARTCC or identifier of the Canadian Air Route Traffic Control Center* of jurisdiction is shown beside the tie-in facility identifier opposite each airport listing. This information has been included to assist in routing IFR Flight Planning messages directly to ARTCC computers.

*NOTE: These may change for any airport depending on letters of agreement, ARTCC boundary realignment, hours of service, traffic flight levels or altitudes. Additions, deletions or changes of such information must be provided to ATO-250 by the involved Air Traffic facilities.

18. METROPOLITAN AREA IDENTIFIERS.

A number of three-letter identifiers have been assigned in the past to designate a metropolitan area where a principal city is served by more than one airport, however, no further assignment of metropolitan codes is contemplated. Existing metropolitan codes are not exchangeable with airport codes at the same location.

19. RECORDS AND REVIEWS.

a. Location Identifiers System records are retained for five years. Research of assignments beyond that time may be done only from history copies of the order.

b. Continuing reviews are conducted to update assignments in the Location Identifiers System. Assignments of more than five years are subject to such overall reviews and meeting current standards.

SECTION 3. APPLICATION FOR IDENTIFIERS AND NAME-CODE ASSIGNMENTS

20. REQUESTS.

Make requests (on Speed Memo, FAA, Form 2800-1, if possible) for all identifier assignments in writing at least 120 days in advance of the proposed commissioning or effective date directly to ATO-250. Include the following information:

(1) For United States airport

(a) Name of the airport (must include site number, if civil airport).

(b) Name of city and state where located.

(c) Type of airport (whether public, private, or military).

(d) Coordinates of airport location; i.e., latitude and longitude in degrees and minutes only.

(e) Center identifier of the ARTCC, if known, which has jurisdiction over area within which the airport is located.

(f) Name or identifier of the FAA tie-in facility for the airport.

(g) Name of scheduled air carriers (or MAC) serving the airport, if any.

(h) Associated NAVAIDs and their assigned identifiers, if any.

(i) Type of weather reports which will originate at the airport, if any.

(2) For navigational aids:

(a) Name of aid as it is to appear on charts. (The general procedure for assigning location and facility names is contained in Order 7400.2C Part 1 Chapter 3. Any further questions regarding such names are to be directed to ATO-250.)

(b) Type of aid.

(c) Name of city and state where located.

(d) Coordinates of NAVAID location, i.e., latitude and longitude in degrees and minutes only.

(e) Airport identifier (if associated with an airport).

(f) Whether located within airport boundaries or distance and direction from airport and whether it is intended to be on any airway.

(g) Whether the frequency of the NAVAID is allocated to a civil or military government agency, or non-federal concern.

(h) Whether permanent or temporary. (If temporary, specify planned period of use.)

(i) Proposed frequency, if available.

(j) Proposed commissioning date.

(k) If an ILS, or to serve a runway, advise runway number and outer marker name-code. (If second, additional, or partial ILS, provide outer marker name-code, even though an outer marker is not now planned. If a fix already exists over the proposed marker site, that name-code should be provided.)

(l) Names and identifiers of the other navigational aids at the same location.

(3) For Weather Offices and Stations:

(a) City and State where located.

(b) Coordinates and elevation of Weather Station.

(c) Type of Station, as described in the publication, "National Weather Service Offices and Stations."

(d) Distance and direction from airport

(e) Type of reports to be originated, entry station and circuit numbers.

(f) Operator (NWS, Coop Observer, Military, Airline).

(4) For Airspace Fixes Name-Codes:

(a) Name of airway fix as it is to appear on FAA Form 8260-2 or in an Airspace Docket.

(b) State in which located, or if over water, associated state.

(c) Type of airways fix (intersection, waypoint, coordination, etc.) and fix description (radials/distance), where applicable, otherwise coordinates or preferably both. If coordination fix only, reason required.

(d) Upon receipt of name-code from ATO-250, file an FAA Form 8260-2:

1 To establish an airspace fix.

2 If converting an existing airspace fix, to cancel the old fix name.

3 For Air Traffic Control Coordination only fixes, include latitude and longitude and specify "no charting." The ATC Coordination fix will then appear only in the appropriate Controller Chart Supplement and in the Airspace Fixes Section of this order.

(5) In all cases of identifier requests, include any other information pertinent to the situation or which may influence the combination of characters chosen for assignment.

b. Forward request for location identifiers as follows:

(1) FAA offices: Airspace-Rules and Aeronautical Information Division, Attn: National Flight Data Center, ATO-250, Federal Aviation Administration, Washington, D.C. 20591.

(2) Members of the Air Traffic Conference of America: Director, Passenger Service, Air Traffic Conference

of America, 1709 New York Ave., N.W., Washington, D.C. 20006.

(3) U.S. Military Facilities and Commands: Through each appropriate Military Headquarters Office.

(4) All others:

(a) Application for a weather observation/reporting station identifier should be sent to: NOAA, National Weather Service, Communications Division W-532, 8060 13th Street, Silver Spring, MD 20910.

(b) Application for a non-federal navigational aid identifier is to be made to a Regional Office of the Federal Aviation Administration.

(c) Application for an airport identifier may be made to: Airspace-Rules and Aeronautical Information Division, Attn: ATO-250, Federal Aviation Administration, Washington, D.C. 20591.

SECTION 4. INTERNATIONAL LOCATION INDICATORS

21. USE OF LOCATION INDICATORS.

An international location indicator is a four-letter code used in international telecommunications. (See ICAO Document 7910 for listing.)

22. REQUESTS FOR ASSIGNMENTS OF LOCATION INDICATORS.

Send requests for international location indicator assignments as follows:

a. Within the United States and its jurisdiction to: Air Traffic Operations Service International Procedure, ATO-331, Federal Aviation Administration, Washington, D.C. 50591.

b. From other States (nations) and Territories to: the appropriate agency within the State or Territory for coordination with ICAO.

SECTION 5. ABBREVIATIONS

23. UNITED STATES AND CANADIAN STANDARD ABBREVIATIONS.

Standard abbreviations for states within the United States and for the Provinces of Canada are used in this Order. Other abbreviations used are:

AAF	Army Air Field
AB	Air Base
ADIS	Automatic Data Interchange System
AFS	Air Force Station
AHP	Army Heliport
ALF	Auxiliary Landing Field (Navy)
ANT	Coast Guard Aids to Navigation Team Station
ARNG	Army National Guard
AWRS	Aviation Weather Reporting Station
BASIC	Basic Contract Observing
CFB	Canadian Forces Base
CCFS	Coast Guard Fog Signal Facility
CGLBS	Coast Guard Light Boat Station
CGLS	Coast Guard Light Station
CGLV	Coast Guard Light Vessel
CGPSS	Coast Guard Port Safety Station
CGS	Coast Guard Station
CNTR	Air Route Traffic Control Center
COMEDS	Continental U.S. Meteorological Data System (USAF)
CONSOLAN	Low or Medium Frequency Long Range Navigational Aid
CVLN	Civilian
DARDC	Device for Automatic Remote Data Collection
DND	Department of National Defense (Canada)
FACIL or FAC	Facility
FCST PT	Forecast Point
FIDO	Flight Inspection District Office
FSDPS	Flight Service Data Processing System
FSS	Federal Aviation Administration Flight Service Station
GEOREF	Geographical Reference Point (VFR flight following, Island Reporting Service, Pacific Region)
GOM	Gulf of Mexico
IATCS	International Air Traffic Communications Station
INS	Inertial Navigation System
MARS	Marine Aviation Reporting Station
MCAAS	Marine Corps Auxiliary Air Station
MCAF	Marine Corps Air Facility
MCAGCC	Marine Corps Air Ground Combat Center
MCALF	Marine Corps Auxiliary Landing Field
MCB	Marine Corps Base
MRBN	Marine Radiobeacon
NS	Naval Station
ODAPS	Oceanic Display Panning System
OLF	Outlying Field (USN)
R	Runway (Canadian Abbr.)
RAMOS	Remote Automatic Meteorological Observing Station
RNG	Radio Range
SA	Combined Synoptic and Aviation Weather Reporting Station
SWOS	Synoptic Weather Observation Station
TGL	Track Guidance Localizer
TRANS	Transportable
USFS	U.S. Forest Service
VTMS	Vessel Traffic Management System
W/A	Water Airport/Aerodrome
WOS	Weather Observation Station
WP	Waypoint
WSMO	Weather Service Meteorological Observatory

ENCODE
CANADIAN AERODROME CUSTOMS POINTS OF ENTRY FOR FLIGHT PLANNING PURPOSES ONLY
SORTED BY IDENTIFIER

All **IFR** and **IFR ADCUS** flight plans will be addressed using the location identifiers listed under the column headed **"IFR FAC"**

All **VFR** and **VFR ADCUS** flight plans will be addressed using the location identifiers listed under the column headed **"VFR FAC"**

Refer to the Canada Flight Supplement to determine Customs hours of service, availability of Customs flight notification service (ADCUS), and relay facility for infrequently used airports of entry.

PROCUREMENT

CIVIL — Subscription prices for one year are: Canada $35.00. U.S.A. $39.00 Cdn., other countries $60.00 Cdn. Single copies sold by CMO are Canada $8.75. U.S.A. $12.50 Cdn., other countries $16.00 Cdn., and sold by a dealer $11.50 Cdn.

MAIL ORDERS ONLY WRITE TO:

Canada Map Office, Department of Energy, Mines and Resources
615 Booth Street, Ottawa, Ontario
K1A OE9

Prepayment is required when purchasing publications and charts. Please make checks or money orders payable to the Receiver General of Canada. Each order should specify whether the order is for the English edition or the Bilingual edition.

DECODE
CANADIAN AERODROME
CUSTOMS POINTS OF ENTRY
FOR FLIGHT PLANNING PURPOSES ONLY
SORTED BY IDENTIFIER

All IFR and IFR ADCUS flight plans will be addressed using the location identifiers listed under the column headed "IFR FAC"

All VFR and VFR ADCUS flight plans will be addressed using the location identifiers listed under the column headed "VFR FAC"

Refer to the Canada Flight Supplement to determine Customs hours of service, availability of Customs flight notification service (ADCUS), and relay facility for infrequently used airports of entry.

PROCUREMENT

CIVIL — Subscription prices for one year are: Canada $35.00. U.S.A. $39.00 Cdn., other countries $60.00 Cdn. Single copies sold by CMO are Canada $8.75. U.S.A. $12.50 Cdn., other countries $16.00 Cdn., and sold by a dealer $11.50 Cdn.

MAIL ORDERS ONLY WRITE TO:

Canada Map Office, Department of Energy, Mines and Resources
615 Booth Street, Ottawa, Ontario
K1A OE9

Prepayment is required when purchasing publications and charts. Please make checks or money orders payable to the Receiver General of Canada. Each order should specify whether the order is for the English edition or the Bilingual edition.

NAS FIXES
COMPULSORY AND NON-COMPULSORY RADIO FIXES

FOLLOWING IS A LIST OF COMPULSORY AND NON-COMPULSORY RADIO FIXES PREPARED BY THE NATIONAL FLIGHT DATA CENTER (ATO-250). IT CONTAINS THE FIXES IN THE NFDC FILES IN EFFECT ON JUNE 01, 1989.THERE ARE STILL SOME APPROACH/TERMINAL AND OCEANIC AREA FIXES MISSING FROM THESE FILES.

THE DESCRIPTION INCLUDES THE TYPE OF NAVIGATION AID THE FIX IS BASED ON. HERE IS THE KEY:

C	VORTAC	LA	LDA
D	VOR/DME	LC	LOC
M	MARINE NDB	LD	ILS/DME
R	NDB	LE	LOC/DME
RD	NDB/DME	LO	LOM
T	TACAN	LM	LMM
U	UHF NDB	LS	ILS
V	VOR	ML	MLS
		SD	SDF/DME
		SF	SDF

THE WAYPOINT CONTRACTION, WP, APPEARS BETWEEN THE NAME AND STATE. THE SYMBOL, ***M***, FOR ***MILITARY*** IS SHOWN ALSO BETWEEN THE NAME AND STATE.

THE WAYPOINTS AND MOST FIXES ARE LISTED WITH BOTH DESCRIPTION AND COORDINATES. IT IS PLANNED TO INCLUDE THE COORDINATES FOR ALL FIXES.

THE FOLLOWING ADDITIONAL ABBREVIATIONS APPEAR IN THE FIX LIST:

AQ	AMERICAN SAMOA	MX	MEXICO
BF	BAHAMA ISLANDS	NA	NETHERLAND ANTILLES
BI	BRITISH WEST INDIES	OA	OFFSHORE ATLANTIC
59	CANADA	OG	OFFSHORE GULF
CN	CUBA	OP	OFFSHORE PACIFIC
DR	DOMINICAN REPUBLIC	PM	REPUBLIC OF PANAMA
FI	FRENCH WEST INDIES	PR	PUERTO RICO
GU	GUAM	TQ	TRUST TERRITORY
HA	HAITI	VI	VIRGIN ISLANDS
JM	JAMAICA	WQ	WAKE ISLAND

PLEASE SEND ANY COMMENTS, CORRECTIONS OR OMISSIONS FOR THIS SECTION TO ATO-258, TEL. (202) 267-9288.
